

VISHNU PEDDINTI

FULL STACK DEVELOPER

CAREER OBJECTIVE

Full Stack Developer with 3+ years of expertise in Java, Spring Boot, Spring Microservices, and the MERN stack, proficient in creating RESTful APIs, scalable, efficient, and innovative solutions. With a strong foundation in both front-end and back-end technologies, I thrive on learning new tools and frameworks to solve complex problems. I am eager to contribute my skills to diverse projects across any domain, while continuously improving code quality, optimizing system performance, and delivering high-value features.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Infosys, Hyderabad | June 2022–Present

- Designed and implemented new features and functionalities in both the backend (Spring Boot, Spring Microservices) and the front-end (React.js, Node.js), improving user experience and system performance.
- Leveraged Java 8 features such as streams, lambda expressions, and the Optional class to improve code readability and performance.
- Developed, tested, and deployed Spring Boot microservices for seamless integration and modularity in the application.
- Enhanced backend performance by optimizing SQL queries and database interactions using Spring Data JPA.
- Integrated various tools like Git for version control, Jenkins for CI/CD, and SourceTree for effective code management.
- Gained client appreciation for consistently improving code quality, optimizing application performance, and implementing innovative features.

Digital Specialist Engineer Trainee

Infosys, Hyderabad | June 2022–August 2022

- Completed a comprehensive training program in Core Java, Java 8 features, and Spring Boot framework, establishing a solid foundation in object-oriented programming, functional programming, and web services.
- Gained hands-on experience with building and deploying microservices using Spring Boot, and enhancing test coverage with JUnit 5.
- Collaborated with senior developers to improve the application's code quality by refactoring legacy code and implementing modern best practices.

EDUCATION

Master of computer applications (MCA)

B V RAJU COLLEGE,
BHIMAVARAM | APRIL 2022.

Bachelors in computer science

B V RAJU COLLEGE,
BHIMAVARAM | MARCH 2019.

RELEVANT SKILLS

Languages:

Java 8, JavaScript, SQL

Frameworks/Libraries:

Spring Boot, Spring
Microservices, React.js, Node.js,
Express.js

Tools:

Git, Jenkins, SourceTree,
Postman

Testing: JUnit 5

Databases: MySQL

Web Technologies:

HTML, CSS, JavaScript

Achievements

- Received multiple client appreciations for the successful delivery of key features and improvements in both back-end and front-end components.
- Recognized for significantly improving the code quality, modularity, and maintainability of complex applications.
- Consistently met or exceeded performance targets by optimizing backend microservices, leading to a reduction in latency and improved scalability.
- Successfully implemented new features in UI and backend, enhancing the user experience and delivering seamless integration with existing systems.

Certifications

- Spring Microservices
- Java Spring Boot
